**CAREER
OPTIONS
FINDER**

**For Use with the Self-Directed
Search™ and Vocational
Preference Inventory™**

By John L. Holland Ph.D.

SAMPLE

DIRECTIONS

The Career Options Finder is designed to be used with the Self-Directed Search (SDS) or the Vocational Preference Inventory (VPI). You should have completed one of these tests and calculated your three-letter Holland code.

There are 1,321 careers listed in this booklet. They reflect the wide variety of industries and occupational groups in which individuals find careers. The careers are listed by their three-letter Holland Codes in the following order: **R, I, A, S, E, C.**

SAMPLE

The nine-digit number after each career is the DOT (*Dictionary of Occupational Titles*) number. The DOT is a standard reference text which provides detailed information on careers. The DOT is usually available in career centers, counseling centers, and libraries. DOT numbers which are followed by the letter S indicate careers which are described in a Supplement to the DOT. Reference texts which provide information about careers are listed at the end of this booklet.
